

Summer Convocation . . .

648 Students Graduate

Today at 7:30 p.m. BYU commencement exercises for 648 graduates will be held in the Great Smith Fieldhouse.

BER SPENCER W. KIM, chairman of the Council of the Apostles, Church of Jesus Christ of Latter-day Saints, will be speaker.

Academic procession, with

Board of Trustees, faculty, and graduates in caps and gowns, will begin at the "T" Bell Tower at 7:30 p.m. and went down the hillside ramp to the Fieldhouse.

OF THE 648 students crossing the stage to receive degrees 10 will receive doctorates, the largest number of doctor's degrees to be awarded at one time

since the doctoral program started at BYU in 1960. Master's degrees will be given to 156 and 494 will get the bachelor's degree. Eight two-year certificates and one special sixth year specialist certificate will be issued.

Thursday's graduation activities will begin with a Senior Luncheon at noon in the Joseph Smith Ballroom. From 3 to 4 p.m. President and Mrs. Ernest L. Wilkinson will greet graduates, parents and friends at a reception in the president's garden.

FORTY-NINE OF THE 648 graduates will graduate from BYU with honors. High honor graduates will be: Judith Ann Bachman, David Lee Chandler, Lawrence Lee Corry, Bryon Wilford Daynes, JoAnn Eckersley, Judith Lorraine Fuller, Betty L. Hansen, John E. Liljenquist, Louise Hansen Lyman, David Heber Pratt, Lynn Shurtliff, Gudrun R. Stowers, Beulah Willeryd, and Lewis Henry Zitzman Jr.

GRADUATES WITH honors will be: Roger James Adams, James Ray Barnes, Gary Norris Batchelor, Barbara Lee Bosen, Diana McFarland Brown, Albert John Eastmond Jr., Judith J. Gates, Lawrence Paul Goldrup, Susan Goodsell, Marva Kay Grover, Richard Michael Hancock, Charles L. Hermansen, Stanley Herron, Janet Hofheins, Chad Leroy Hoopes, Ronald Mack Jarvis, and Howard H. Klawies.

John Z. Karchner, Karen Dee Keller, Mary Lee Klomp, Marilyn Larsen, Reta Lynn Stanard Lund, Gordon Ervin Moss, Francis Craig Otterstrom, John Wendell Parker, Jackson D. Pemberton, Joan Shirley Reid, William Dudley Sill, Shirlee Ann Simpson, Owen James Stevens, William Clair Stringham, Joan Warner, Novell Mitchell Wells, Wayne M. Wright, Nodla Beth Nelson Wunderly.

Scouts To Arrive At 'Y' For International Meet

will welcome over 3,500 Boy Scouts from the western half of the country and from at least 40 foreign countries, Friday morning, to start the first international LDS Explorer Conference.

Scouts will participate in an invitational schedule of discussions, leadership training and recreational events. According to William Smart, general chairman of the event, the delegates will have skill competitions and 104 instruction classes available.

FRANK R. SHERVER, director of the Peace Corps will be keynote speaker. His address will be "The Attainment of Peace." Other prominent speakers will be Joseph A. Burton, scout executive for the Boy Scouts of North America; President Hugh B. Brown, senior counselor in the First Presidency of the Church of Jesus Christ of Latter-day Saints.

SEVENTY-NINE scout posts will participate in the conference. Scout trains will arrive Friday from Los Angeles bringing 421 scouts from Southern California. Other trains will bring scouts from Portland, Ore., and

Canada. Twenty-five will arrive by bus from Alaska.

Others will arrive from as far away as Venezuela.

Purpose of the conference is to develop LDS leadership in local stakes and help the boys find their life's vocation.

New Students To Arrive Early

Freshman and new sophomores will arrive on campus for orientation and testing a week before upperclassmen. Orientation is scheduled September 17, through 20. New students will have their own registration September 21.

REGISTRATION will be held in the Fieldhouse Monday and Tuesday, September 23, and 24. Class instruction will begin September 25.

With the opening of classes, the Honors Program will begin its fourth year. It was established in 1960 to provide special opportunities and direction for superior students.

General requirements are waived for the students under the program.

"Your turn will come son," says Michael J. Brady to his baby, Chris. He and his wife, Margaret try on caps and gowns in preparation for BYU commencement exercises Thursday. They will be among the 648 to receive degrees in the rites.

Mexico's Unexplored Regions Scene of Coming Expedition

"One of the most fantastic areas in the western hemisphere," an area which was first discovered in 1893 and first entered in 1950 will be the object of a concentrated expedition led by John L. Cross Jr., of Orem.

NEARLY THREE TIMES as deep as the Grand Canyon of the Colorado River in Arizona, the Barranca de Colera and the Barranca de Unique Canyons of Chihuahua province, in Mexico have never been explored to their entire length.

From explorations along the burro and goat trails, some explorers have returned with fantastic tales of mineral wealth, teeming wild life and exotic plants, many unknown to science.

According to John L. Cross Jr., the rim of the two canyons is covered with yellow pine. Lower

regions are covered with cedar, oaks and similar trees. Tropical growth; oranges, bananas, pineapple, and papaya are in the lowest parts of the canyons. Birds and animals of the jungle such as jaguar, ocelot, puma and deer inhabit the lower area.

THE EXPEDITION IS EQUAL or above that of the conquering of Mount Everest according to the senior Cross.

Seventeen people will make the trip. Cost per person will be \$275.00.

LIFE MAGAZINE, the University of Michigan, the American Museum of Natural History, the Mexican Government, and others are interested in the exploration. Material and information gained from the trip be shared with interested parties. Cross said.

As Jensen, BYU geology curator, (car) directs unloading of dinosaur skull from freight car. The skull weighs

over one ton and is the largest found anywhere in America. It will become a part of BYU's Collection.

Y Natural Science Museum Gets Largest Dinosaur Skull

A triceratops skull, probably the largest dinosaur head ever found, has been discovered and freighted to BYU by James A. Jensen, geology curator.

THE GIANT fossil arrived at Provo Monday in a railroad car from Miles City, Mont., near the site of Mr. Jensen's diggings. It was discovered in the Hell Creek beds of the Fort Peck reservoir area.

The skull itself weighed over a ton, while the entire field package of skull, burlap, plaster and crating weighs about two tons. The skull is about six foot wide and nearly nine feet long.

BYU IS IN the midst of a big push to assemble an outstanding paleontological museum in the Eyring Physical Science Center, and the new acquisition will become an important part of the said.

new development, Mr. Jensen found the skull during an exploratory trip last spring and returned this month with a crew to help recover the geological treasure.

MR. JENSEN reported the prize was removed with great

hardship. The crew had to build a quarter mile of road by hand to get heavy equipment to the site to hoist the skull. It was painted with several gallons of shellac to harden the surface. Then it was covered with burlap and half a ton of plaster of paris, and a crate of heavy timbers was constructed around it.

THE BYU scientists also were assisted by Harvard University field crews and Mr. Rosendo Pascual, head of the paleontology department of the Museum of La Plata, Argentina. The same three institutions are planning a joint expedition into the foothills of the Andes mountains next year.

THE TRICERATOPS lived at the end of the age of dinosaurs. It was a plant eating reptile with three horns and a bony over the back.

Mr. Jensen estimated the animal was about 25 feet long and stood about eight feet tall. The huge skull, not counting its matric, accounted for about a fourth of its length. He said an odd circumstance with triceratops skulls is that the rest of body skeleton is not found with them.

Universe Editorial Page

All editorials are written with the concurrence and advice of Editorial Board, but final responsibility rests with the editor.

Editor Goes Sentimental

I suppose every editor has the right to be sentimental at one time in his life and that time is the day his final paper goes to press. Today, the 1962 Summer Universe staff sees (in print) the efforts of their work for the final time. Tonight some members of the staff will graduate and leave this campus with memories of work and play.

NOTHING BRINGS a group of people closer than slaving to meet that deadline or sweating and straining to make one "lousy" headline fit. It has been this type of thing which the Summer Universe staff has done twice a week throughout the summer.

Many of the staff members had never worked on a paper before; but were willing to try. Others had to leave school in the middle of the summer, cutting the size of the

staff nearly in half. However, those remaining have certainly been troupsers.

BRUCE OLSEN, assistant editor, was always on hand with advice and ability to do the job. He will take over the fall as editor. Tom Fensch, news editor, joined us just for the summer and I'm sure Bruce will miss him.

Marilyn White, sports editor, wrote, edited and made up the sports page with great facility; while Kay Huff, Don Searle, Dean Zimmerman, Galen Gadd, Linda Netherton, and Ron Barker worked far above and beyond the call of duty.

I EXTEND publicly, my deep appreciation and gratitude to them. They were the reason you had the opportunity of reading a paper.

Campus Comment 'Best Summer We've Had,' Says School Director, Peterson

And Controversy Experience—Worthwhile

Editor—Daily Universe

On these lines, and in these columns, where the entire Universe staff has sweated and slaved, and pulled their hair at times, I'd like to pause and reflect for the short duration of four inches of type.

The Universe experience, with its my meager experience, the best work I've done. I'm grateful for the Universe experience—the friendship and help of the rest of the Universe staff I salute in printer's ink on the printed page.

I've learned more about headlines, style, layout, and the rest of the technicalities than I ever will again. This training is very valuable; as other journalism students know. The ability to write and, on occasion, write well, is a much-sought-after skill. Those who have it are blessed.

In my last inch of space, I wish the Universe the best; Bruce and staff will, I'm sure, publish a paper that does BYU well.

Thank's pang, for the opportunities and help. I hope you should have the help I've had.

Tom Fensch, News Editor

Officers Thank Aids, Students

We, as studentbody officers, would like to thank all those who have contributed to the success of the summer school activities. There have been many members of the administration, faculty and student body who have generously given of their time, and services to the summer school program.

WE WOULD LIKE to extend a special thank you to the following: Don Jones for our successful chicken fry; Rod Henderson, watermelon bust chairman; Don Tenney for our fabulous Summer Formal last weekend; Gary Eyring for his work as business manager.

The following people have also been of great help this summer: Elmer Holte, publicity director; Tim Hoyt, Central Dance chairman; Linda Huntington, assembly chairman; Shelly Smith, historian; Bob Anthon and Lela Sprout, record keepers; Gordon Maass and Ron White, Lagoon Day; Chad Wright, watermelon bust; Wayne Dolman and Rick Smith, as dance chairman; and the many people who worked on each committee.

WE WOULD LIKE to thank the Universe for their help and cooperation in publicizing our summer activities. These are the students coordinator's office have also lent invaluable assistance. One of the most effective contributions to the success of our summer activities has been the large student body attendance at our major summer functions. To you, the student body, we extend our appreciation for your support this summer.

Larry Stratford, President

Tony Allen, Vice President

Carleen Shackelford, Secretary

DR. PETERSON has reason to be proud. In a year when summer school enrollment should have dropped, it reached an all-time high. Of the 4,100 students enrolled in the second session of BYU summer school, over 600 will receive degrees in commerce exercises Thursday night.

Because the absence of church seminary and institute teachers from summer school year, enrollment was expected to drop. Instead, it climbed to the record 4,100 figure, a 72 percent increase over enrollment in Dr. Peterson's first year as summer school director.

FIGURES SHOW that general enrollment, number of undergraduates enrolled, number of classes, and geographical distribution of students are all better this year. Two-thirds of the students enrolled in summer school this year are undergraduates. Almost all colleges have increased in summer enrollment, more than 30 and 30 percent. Every state, except Delaware, and 29 foreign countries are represented in BYU summer school.

Dr. Peterson complimented the faculty members very highly. He also complimented the summer studentbody officers on the way they handled their duties. He remarked that this year has been a good climax to his term as summer school director.

LDs Uses Radio On World Level

Ron Todd, program coordinator of the International Educational Broadcasting Corporation which is a corporation of the Church of Jesus Christ of Latter-day Saints, addressed a group on the role of international broadcasting today. The group was made up of students and church communicators.

The church, he said, has shown foresight in going into this field. It will provide a means for emergency as well as a regular contact with members around the world.

The church owns five of seven privately owned short wave transmitters in the United States.

'Around the World' Tour Planned for Next Year

The BYU Travel Study Department of the Adult Education and Extension Services program, is planning a worldwide tour for the summer of 1963, according to Dr. Preston R. Glendhill, tour director.

THE EXCURSION will take participants through 25 countries. The first stop on the trip will be Hawaii, where the world travelers will get a look at the island and many of its attractions.

From there, the tour begins a series of stops which will take the travelers through East Asia, Africa, the Near East and the Mediterranean region touching Southern Europe.

The first stop in the Orient will be Japan. Along with the other activities planned for the group a visit will be made to the Kabuki Theatre for a taste of Japanese classical drama.

After Japan, the tour will go to Taipei, Hong Kong, Manila, Saigon, Singapore, Jakarta and Bangkok according to Dr. Glendhill.

AFTER THAILAND, the tour will go to India for five days. One of the featured attractions here will be an elephant ride. The group will go through Kashmir, and then go to Africa for a motorized camera safari through Kenya and Uganda. The tour will swing up to Cairo, over to Lebanon and the Near East, and include a tour of Jerusalem, Athens, Rome, Palermo and Sicily are on the agenda. From there, the group will fly home, unless some of the participants want to go to parts of Europe.

Watch For . . .

Cheer Club: Dick Daly reminds all cheer players that the club will meet Thursday at 7 p.m. in Cannon Center.

Weekly meetings will continue every Thursday at 7 p.m. in Cannon Center until school starts.

Caps and Gowns: Graduates will leave their caps and gowns in the Fieldhouse, following graduation.

BYU Glaciologist Tells of Work With Glaciers

by Linda Netherton

"Glaciology is a pure science," stated Marion Millett, "in wide answering questions as much as in solving questions to be answered."

MARION MILLETT, a BYU Glaciologist, became interested in glaciology while working on a MA degree at the University of Colorado. Since then, he has made numerous trips to Alaska to study the glacial characteristics.

A glacier is a mass of ice and usually some snow that moves slowly over the land or over evidence that it has so moved. The ice becomes stagnant in some cases, and ceases to move, and many glaciers move in some distances from land to lakes before they break up in form icebergs, said Mr. Millett.

WHAT CAUSES glacial movement is not yet fully known. What ever the causes of the movement may be the nature of things. Glacial boulders are found that are beautifully polished in one side, only showing scratches oriented in only one direction, added Mr. Millett.

IN ALBERTA, situated in Rocky Mountains, there are boulders that have moved more than 700 miles, and are now 4,500 ft. above their source.
